Dette dokument indeholder telestatistik for andet halvår 2005 (perioden 1. juli – 31. december).

Som følge af den hurtige udvikling inden for telesektoren har IT- og Telestyrelsen siden 1998 udarbejdet halvårlige telestatistikker. IT- og Telestyrelsens Teleårbog indeholder yderligere statistikker om telesektoren i Danmark.

Telestatistikken er blevet til på baggrund af indberetninger fra udbydere af kommunikationsnet og -tjenester i Danmark. Telestatistikken omfatter følgende udbydere:

101 Systems	ESS Energi Danmark
3	Facicom A/S
A+ Arrownet A/S	Fascom A/S
A+ Telecom A/S	Fonet ApS
ACN Danmark A/S	Foniris Telecom A/S

Telia Stofa A/S (ejet af Telia)	Yes I HOTSPOT Aps.

Denne telestatistik er udbygget med oplysninger om bredbånd fra en række kilder, der ikke tidligere har været medtaget.

Der indgår således oplysninger fra 5 uafhængige bolignet. Det drejer sig om Bolignet Århus, Dalgas Have (Frederiksberg), Parknet (København N.), Skydebanen (København V.) og Sprotoften (Nyborg).

Endvidere er der medtaget oplysninger fra følgende 3 leverandører til uafhængige bolignet: Indienet, Phonenet og Vesterbro ADSL.

Der indgår også oplysninger fra 9 fællesantenneanlæg. Det drejer sig om Faaborg Vest Antenneforening, Fanø Kabelnet, Galnet (Odense), G.V.D. Antenneforening (Aalborg), ka-net (Kalundborg), Klarupnet, NAL-NET (Næsby), Tune Kabelnet og Vejen-Net.

Også DjurslandS.net har leveret oplysninger til statistikken.

Endelig indgår der oplysninger fra 94 kollegier.

Telenet og teletjenester kan som udgangspunkt udbydes i Danmark af enhver uden forudgående tilladelse, registrering eller lignende. IT- og Telestyrelsen tager derfor det generelle forbehold, at muligvis ikke alle udbydere af telenet og teletjenester på det danske telemarked indgår i telestatistikken. Især på markedet for udlandstrafik er der de senere år kommet flere udbydere, som ikke er omfattet af statistikken.

Som følge af afrundinger vil summen af tal i tabeller og figurer ikke altid give den viste total.

## Signaturforklaring

## Preface

This document presents telecommunications statistics for the second half-year of 2005 (1 July - 31 December).

Following the development in the telecommunications market the National IT and Telecom Agency (NITA) has produced half-yearly telestatistics since 1998. The agency's Tele Yearbook includes additional statistics on the Danish telecommunications sector.

Telecommunications statistics are compiled based on reports from providers of communication networks and services in Denmark. The following providers are included in the telecom statistics for the second half-year of 2005:

<i>101 Systems</i>	<i>Equant A/S</i>
<i>3</i>	<i>ESS Energi Danmark</i>

*The telecom statistics for the second half-year of 2005 has been extended with data concerning broadband from a number of sources, which have not been included in previous statistics.*

*Data from five independent providers of broadband connections via internal networks within housing associations and student youth accomodations are included: Bolignet Århus, Dalgas Have (Frederiksberg), Parknet (Copenhagen), Skydebanen (Copenhagen) and Sprotoften (Nyborg).*

*Furthermore, data from three equipment suppliers of broadband connections via internal network within housing associations are included: Indienet, Phonenet and Vesterbro ADSL.*

*The telecom statistics also include data from 9 independent community network providers of cable modem services: Faaborg Vest Antenneforening, Fanø Kabelnet, Galnet (Odense), G.V.D. Antenneforening (Aalborg), ka-net (Kalundborg), Klarupnet, NAL-NET (Næsby), Tune Kabelnet and Vejen-Net.*

*Data from DjurslandS.net is also included.*

*Finally, the telecom statistics also include data from 94 student youth accomodations.*

*Telecommunication networks and services may be provided in Denmark by anyone without a preceding licence, registration, or similar. Consequently, reservation is made to the possibility that not all providers of networks and services within the Danish telecom market are comprised in the statistics. Particularly, more providers have been established on the market for outgoing international traffic. Not all of these providers are included in the statistics.*

*Due to rounding numbers in tables and figures do not always add up to the shown total.*

<sup>1</sup> Statistikken omfatter udelukkende opkald foretaget fra slutbrugere via fastnettet, enten som traditionel telefoni (PSTN / ISDN) eller som IP-telefoni. Statistikken inkluderer således ikke trafik fra mobilnet, der transiteres via TDC's net, ligesom trafik fra andre fastnet, der transiteres via TDC's net, ikke indberettes af flere udbydere.

The statistics includes only calls made by subscribers on the fixed network, either as traditional telephony (PSTN / ISDN) or as VoIP. Thus, transit traffic from mobile networks via TDC's network is not included and transit traffic from other fixed networks via TDC's network is not registered more than once.

<sup>1</sup> Omfatter GSM-, GPRS- og UMTS-abonnementer inklusive aktive taletidskort, ultimo perioden. I 2003 inkluderes taletidskort, der har været aktive de seneste 6 måneder. Fra og med 2004 inkluderes taletidskort, der har været aktive de seneste 3 måneder. Et taletidskort betragtes i 2003 som aktivt, hvis der har været foretaget udgående opkald eller "genopfyldning". Fra og med 2004 anses et taletidskort som aktivt, hvis der har været ind- eller udgående trafik eller har været foretaget "genopfyldning". Indekseringen er foretaget ud fra hvert halvårs gennemsnitlige antal mobilabonnementer.

*Comprises GSM, GPRS and UMTS subscriptions including active pre-paid cards at the end of each period. Pre-paid cards that have been active within the last 6 months are included in 2003. As of 2004 only pre-paid cards, that have been active within the last 3 months are included. In 2003, a pre-paid card is defined as active if there has been outgoing traffic from the telephone (the pre-paid card) or if it has been reloaded. As of 2004 a pre-paid card is defined as active if there has been incoming traffic to or outgoing traffic from the telephone (the pre-paid card) or if it has been reloaded. Indexing is based on average number of mobile subscriptions each half-year.*
